

# ONE PILL CAN KILL

COMMUNITY  
PRESENTATION

HOSTED BY  
EASTSIDE CATHOLIC SCHOOL

**WHAT  
EVERY  
PARENT  
& TEEN  
NEEDS TO  
KNOW  
ABOUT  
FENTANYL**

# COMMUNITY FORUM

## DID YOU KNOW...

Fentanyl is a deadly synthetic opioid that is being pressed into fake pills or cut into heroin, cocaine and other street drugs to drive addiction.

Illicit fentanyl is **50x more** potent than heroin.

Most street pills **are** laced with fentanyl.

It only takes a very small dose of fentanyl to be lethal – as little as the amount that can fit on the tip of a pencil lead (2 milligrams).

Fentanyl and other substances are negatively impacting the health of youth and adults in our region. Adults and teens are invited to join us to learn about the risks of fentanyl and other substances from the DEA's "One Pill Can Kill" presentation.

**Learn how you can protect yourself, your family and others.**
